BRL Test - Premium Electronic Test Equipment Sales and Repairs

<http://www.brtest.com>

BRL Test – low prices on sales and repairs is what we're about. Our world class repair lab is what sets us apart. Premium quality used spectrum analyzers, network analyzers, oscilloscopes, signal generators, communication testers, RF, microwave, telecommunications equipment and more. Shop and save on over 7,000 models from Agilent, HP, Keysight, R&S, Anritsu, Advantest, Tektronix and the like. Each unit is calibrated and certified per order. Z-540 & 17025 calibrations also available (ISO9001:2000 / A2LA.) Purchase easy knowing that you are receiving high quality equipment ready to work accurately right out of the box – no worries.

BRL Test in House Repair Engineering Group

Free repair evaluations. Extend the life of your equipment and save thousands of dollars in replacement costs.

Our technicians are military PMEL graduates who average over 15 years of comprehensive repair experience. BRL Test stocks a large inventory of repair parts. Wouldn't you like a friend like that on your side?

BRL Test Inc - Company Profile

BRL Test, Inc. is a leading dealer of quality new and reconditioned test & measurement equipment headquartered in central Florida. BRL's services include the sale of premium new and refurbished equipment, short-and long-term rentals, acquisition of your underutilized equipment, along with repair, maintenance and calibration.

We carry well over 50 manufacturers with thousands of model numbers. We specialize in Hewlett Packard, Agilent, Tektronix, Anritsu, Fluke and Rhode & Schwartz. To ensure high reliability, all equipment is shipped with certificate of calibration performed in an ISO 9001-2000 Registered/Certified and A2LA Accredited (17025 & Z-540) facility. You also have the added reassurance of a complete written warranty and right of refusal period (see terms and conditions link below.)

"It's the service after the sale that counts!"

BRL Test is an industry leader in providing superior customer service to our clients around the world. We have experienced personnel who know and understand the acquisition and capital approval process. You can be sure that your representative has received endless hours of training to ensure your needs are met immediately and with high-reliability.

BRL Test's global support team is there for you before, during, and after the sale. It is our firm belief that it's the service after the sale that really counts. We follow up to make sure all customers are completely satisfied with their equipment and support. This superior approach to customer service is cementing BRL Test Inc as the most customer oriented supplier in our industry.

Services

Sales

BRL Test buys and sells over fifty manufacturers and thousands of model numbers. You can save between 20%-80% off manufacturer's new list prices. All equipment comes calibrated with NIST traceable certificate, parts & labor warranty, and right of refusal period. Thus, you can rest assured that the equipment arrives at your facility and ready for work. Delivery is generally 7-10 days from time of order but can be expedited at customer's request.

Rentals

BRL Test's entire inventory is available for short and long-term rental. We offer competitive rates and can even forward a portion of your rental rates toward the purchase price of the equipment; just ask your sales representative for details.

Leases

BRL Test has available many different lease options to accommodate your financial requirements. We can provide a lease calculator with your quote, just ask your rep when calling or emailing.

Equipment Buyers

BRL Test is quickly becoming the largest buyer of used test equipment in the industry. We buy a wide variety of equipment and can pay you a fair price for your unwanted gear. When given the opportunity, we can turn your under-utilized test equipment into cash, or reconditioned equipment you can use now, or we can go directly to a manufacturer and buy you brand new equipment. Please speak with a BRL representative now about turning your underutilized assets into useful capital!

Calibration

BRL Test offers full service calibration laboratory capabilities. We calibrate a wide range of electronic test and measurement equipment from voltmeters to 50 GHZ Network Analyzers. Our mechanical calibration capabilities range from Accelerometers to Vacuum Gauges. We offer on site calibration services throughout the southeast.

Repair

BRL Test can Repair equipment from most major manufacturers, and we can do so for 20-60% off manufacturer's standard repair costs.

Electronic Test Equipment Repair - Free Evaluations

BRL Test's world class repair facility features:

- Military trained technicians
- PMEL Certified/Superintendent (top level 9)
- 18 years on average experience
- Large inventory of repair parts
- 90-day warranty
- Low pricing

We repair spectrum analyzers, network analyzers, signal generators and more. We even do repairs the manufacturers can't do.

Because of the complex nature of test equipment repair, our competitors often end up contracting us for their repairs. Why not start here from square one without the middleman?

*PMEL is an acronym for Precision Measurement Equipment Laboratory. Level 9 is the superintendent level - above student, apprentice, journeyman and craftsman. There are only a handful of technicians in the world with this level of experience.
